PROFESSIONAL SUMMARY

Technical Project Manager with a Computer Science and software development background, experienced in driving digital products from requirements and technical planning through engineering execution, QA/UAT and release. Translate business requirements into implementation-ready specifications, manage dependencies and delivery risks, and coordinate cross-functional teams across product, engineering and design. Previous frontend development experience provides a strong technical foundation for working with APIs, integrations, architecture and implementation decisions.

EXPERIENCE

Technical Project Manager

Jan 2026 – Present

KEYS Community & Bright Bridge Connect | London, United Kingdom — Remote

- Drive technical product delivery across KEYS Community and Bright Bridge Connect, coordinating a cross-functional team of approximately 12 across engineering, design and other product functions.
- Manage delivery across requirements, technical planning, engineering execution, dependencies, blockers, QA/UAT and release readiness, including delivery activities for KEYS Phase One.
- Translate business and product requirements into implementation-ready PRDs, user stories, acceptance criteria, functional specifications and workflow documentation for engineering and design.
- Established requirements traceability across product requirements, designs and implementation, identifying inconsistencies and missing requirements before development and creating clearer handoffs between Product, Design, Engineering and QA.
- Led a structured implementation gap analysis across confirmed product requirements and existing backend functionality to identify completed, partial and missing capabilities and inform engineering priorities.
- Introduced and refined delivery processes covering development readiness, sprint planning, stabilization, documentation standards, QA/UAT, handoffs and release criteria.
- Coordinate internal engineers and external development partners across parallel workstreams, managing dependencies, blockers, ownership and integration risks.
- Lead QA/UAT coordination and requirement-based validation to ensure delivered functionality meets agreed business and technical acceptance criteria before release.
- Contribute to product and technical decision-making across feature definition, user flows, API dependencies, infrastructure planning, hosting, data/security considerations and technical feasibility.

Technical Project Coordinator (Freelance)

Mar 2025 – Present

Africa Gaming Expo (AGEAfrique) | Remote

- Coordinate technical projects and strategic initiatives across Africa Gaming Expo and affiliated businesses, managing timelines, stakeholders, actions and cross-functional delivery.
- Secured official airline partnerships with Kenya Airways for Africa Gaming Expo 2026 and Ethiopian Airlines for Africa Gaming Expo 2027, originating both partnerships through direct cold outreach and managing stakeholder engagement through partnership development.
- Support software delivery through requirements clarification, user stories, acceptance criteria, backlog refinement, progress tracking and coordination between engineering and design.
- Coordinate QA and UAT across web and mobile products, supporting defect resolution and release readiness.
- Project managed AFRIPitch, coordinating stakeholders, timelines, communications and delivery activities.
- Designed and developed the Africa Gaming Expo 2026 Dynamic Display Picture Generator and built and maintained the corporate website for Pinhole Services Nigeria Limited.

Frontend Developer

Mar 2024 – Feb 2025

Zenon | Remote

- Developed and maintained core frontend features for Zenon's digital platform using React, Next.js and JavaScript.

- Translated high-fidelity product designs into responsive interfaces and end-to-end user flows, integrating backend APIs with RTK Query for data fetching, caching and state synchronisation.
- Collaborated with product managers and backend engineers to clarify requirements, resolve implementation issues and deliver production-ready features.

Frontend Developer Undergraduate Intern

Jan 2023 – Jan 2024

Purejim Limited | Nigeria

- Built frontend functionality for School Management and Events Management systems using React, Next.js, JavaScript, HTML and CSS.
- Developed dashboards, administrative interfaces, forms, event listings, booking flows and student/teacher modules while collaborating with designers and backend engineers.
- Improved maintainability through reusable components, optimised asset handling and modern frontend development patterns.

EDUCATION

Bachelor of Science in Computer Science | Lagos State University, Ojo, Lagos
Aug 2021 – Oct 2024 | CGPA: 4.11/5.0

CERTIFICATIONS

Professional Scrum Master I (PSM I), Scrum.org Nov 2025
Assessment score: 100%

Certificate in IT, British Computer Society Dec 2025
Information Systems, Computer & Network Technology, Software Development

SKILLS

Technical Project & Program Delivery: Agile Delivery, Sprint Planning, Backlog Management, Release Planning, Risk & Dependency Management, Cross-functional Delivery, Stakeholder Management, Process Improvement

Product & Requirements: PRDs, Requirements Analysis, Product Discovery, User Stories, Acceptance Criteria, Requirements Traceability, Feature Prioritisation, User Flows, Functional Specifications

Technical: REST APIs, API Integration, Git/GitHub, React.js, Next.js, JavaScript, HTML/CSS, SQL, Python, AI-assisted Development

Quality & Release: QA Coordination, UAT, Test Case Design, Defect Management, Regression Testing, Release Readiness

Tools: Jira,Confluence, Notion, GitHub, Figma, Plane, Slack, VS Code, Microsoft Office
